SUMMARY

I'm a Senior Product Designer who, for over a decade, has focused on designing impactful digital products and experiences, always with an eye toward simplifying the complex while ensuring top-tier usability and accessibility.

I also have front-end knowledge and a degree in marketing, two skills that work as an ideal complement and allow me to know and understand the entire design process, from research, context analysis, conceptualization, to solution and definition of metrics, in order to create more effective and goal-oriented solutions.

EXPERIENCE

- November 2020 - Present
Senior Product Designer - IMMFLY
Revolutionizing in-flight digital products by crafting intuitive interfaces that enhance passenger engagement and satisfaction. I collaborate with developers and product managers to ensure a seamless integration of business requirements, technical constraints and user needs into best in class products for airlines such as British Airways, Iberia, Level and Vueling.
- September 2012 - October 2020
Senior UX/UI Designer - Concreta
Started as UX/UI designer and evolved in the role. Throughout these years I designed, coded and managed noteworthy projects, creating all kinds of digital solutions that are used daily by thousands of users, from forms and mobile apps to self-service terminal's UI and complex design systems.
- January 2011 - October 2020
Graphic and Web designer - Freelance
Over the years I've also worked as freelance as a graphic and web designer, helping brands and individuals find their new visual identity, launch cool apps and build eye-catching and intuitive websites.

EDUCATION

- October 2019 - June 2020

Master in Digital Experiences Design - BAU Design College of Barcelona

UX Research, UX/UI Design, Product Design, Agile, Lean UX and Front-end.
